

50% Geek • 50% Crazy • 100% Designer

PERSONAL STATEMENT

I am studying Metallurgy and Materials Engineering at IIT Roorkee. Working as a designer has taught me that no matter what you work on, each project is different in its own unique way. The clients, the audience and the design combine to create a relationship between the user and the brand. An out of the box thinker, self motivated with a high degree of work integrity, I design with religious fervour keeping my approach wholistic yet simple. This draws inspiration from nature which being the essence of minimal design, is apparent in all my works.

WORK EXPERIENCE

SDSLabs
